Document Purpose:

This document aims to describe the specifications of each use case.

Target Audience:

The target audience of this document are the potential users, the evaluators/professors, and the developers, themselves.

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
09/29/16	Eunice Angel D. Cruz	1.0	Initial Document; Use-case description 1.2 Edit budget details

*Use-Case Name*:   Use-case 1.2 Edit budget details

Description: This use case allows the users to edit existing data regarding the student's budget details. Once the student realized that some of the budget details entered were wrong, or there are adjustments needed in the budget allocation, he/she can edit the information he/she previously entered.

Preconditions: None.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) The student wants to change the amount of his/her allowance	The system displays the budgeting information in editable fields.
	The student edits the amount of his/her allowance and selects "save changes".
	The system saves the changes and displays the updated budgeting information.
Scenario 2 The student wants to change the time frame of budgeting	The system displays the budgeting information in editable fields.
	The student edits the time frame for budgeting and selects "save changes".
	The system saves the changes and displays the updated budgeting information.
Scenario 3 The student wants to change the expenditure limit	The system displays the budgeting information in editable fields.
	The student edits the amount of his/her expenditure limit and selects "save changes".
	The system saves the changes and displays the updated budgeting information.
Scenario 4 The student wants to add another category	The system displays the budgeting information in editable fields.
	The student adds a new category and allocates a certain amount from the budget and selects "save changes".
	The system saves the changes and displays the updated budgeting information.
Scenario 5 The student wants to remove a category	The system displays the budgeting information in editable fields.
	The student removes a category and allocates the money somewhere else, then selects "save changes".
	The system saves the changes and displays the updated budgeting information.
Scenario 6 The student wants to add additional expense details	The system displays the budgeting information in editable fields.
	The student adds supplementary expense details to a category and selects "save changes".
	The system saves the changes and displays the updated budgeting information.
Scenario 7 The student wants to remove additional expense details	The system displays the budgeting information in editable fields.
	The student removes supplementary expense details from a category and selects "save changes".
	The system saves the changes and displays the updated budgeting information.
